PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/718,252	Applicant(s) WILSON ET AL.	
	Examiner Sarah Purol	Art Unit 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Futch et al 4,954,760.

Futch et al. teach a bin 12 having an interior space to support a collection of items to be supported. Support members 18 support the shelf between multiplicities of vertical positions. Motor 28 imparts rotational movement to the support members via a drive sprocket 49 and chains 29 (See Col. 4, lines 1-7). An electrical conduit 36 carries connections from motor 28 to a housing 38 mounted atop frame 12. Upper and lower infrared sensors 39, 40 detect the presence of the tray (shelf) and signals the motor to adjust the height up or down accordingly. The motor can be powered by battery or may be pneumatic and include a manual switch.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Futch et al. '760.

The method recited is considered to have been obvious in view of the article for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Similar adjustable display devices are illustrated by Frich 6,000,770; Kahler 6,745,588; Stein 4,662,523; Wentworth 5,314,080.
